

# **TOOLS AND TECHNOLOGIES USED DURING PROJECT DEVELOPMENT**

## **HYBRID APPLICATION OF WAREHOUSE MANAGEMENT SYSTEM**

### **Team members:**

Chittoori Meha (S2)

Chaitanya Reddy (S2)

Challamala Krishna Priya (S2)

Jallepalli Prerna (S3)

Madarapu Srikar (S3)

Tools used for specification phase	Argo UML Creately Microsoft office Paint
Tools used for design Phase	Argo UML Creately Microsoft office Android device (for UI compatibilty) IOS device (for UI compatibility) Paint
Tools used for coding /development	Sublime text 3 (Text editor) Phone gap desktop application Phone gap developer application Postman (For testing scripts) Apache server My SQL server and Client Google chrome (standard browser) Virtual box (For Mac OS X platform)
Tools used for assessment of code quality	For PHP: PHPUnit RIPS PHPloc For JavaScript: Google Closure compiler application JS hint version SonarQube SideKick
Tools used for Testing	Postman Apache server MY SQL database Android studio Standard browser Virtual box Android device IOS device Google developer tool
Tools used for team collaboration(git is default value in this)	Github Slack Whatsapp Gmail
Tools used for project management if any	Not Applicable

Tools used for performance analysis of the application , if any	Android Monitor Little eye
---	-------------------------------

### Technologies:

<b>Frameworks</b>	Phone gap
<b>Libraries</b>	JQuery Bootstrap JQplot
<b>Database:</b>	SQL server
<b>Protocol</b>	HTTP
