FW: Mobile App

Durga Prasad Venkata Chittoori <durgaprasad.c@hcl.com> to me Aug 18

Meha,

The following is the problem statement for one of the requirements in our projects. A detailed functionality list, expectations, data base requirements etc will be discussed with your team next week. Based on the outcome of the project by your team, the mobile app code will be leveraged for the ERP products. This is going to be a good app for our future projects in ERP vertical.

Regards,
Durga Prasad

Subject: RE: Mobile App
Importance: High

Durga,

The scope of work will be as follows. Hope this helps

“Development and Testing of Mobile application for Warehouse management to be used in Supply Chain and ERP industry verticals. The mobile application should be a hybrid application which will work on multiple OS platforms like Android, iOS and Windows Mobile. The intent of developing such mobile applications is to optimize the work flow and improve efficiency of the Warehouse workforce.”

Dear Team,

Nice talking to you this evening. Good to see the **minutes of the meeting**. This is an important project for us and we look forward to have a productive and working app from you. Do well and wish you all the good luck.

Please note the email id of your mentor Krishna Prasad (KP). Send the project communication to KP directly and schedule the periodic **meetings** with him based on his calendar availability.

Sir,

We would like to request for a meeting tomorrow according to your convenience. The meeting would be concentrating on the structure of database and the project proceedings till now. We have made the database and UI separately but did not connect them as we would like you to finalize it, before moving further.

Hoping to connect with you soon.

Thank You,
Team

Hello Sir,

We have started making the graphical reports. We are trying use some API's for generating dynamic charts, while working on that we had found out some which are helpful in generating responsive dynamic charts. Below I have mentioned all the links of what we have found. Please check once and add your suggestions on them.

Also while generating the charts we have usual queries as such:

- 1) For Bar Charts : What should be the on the x-axis and y-axis for different charts (Eg: for products reports, for warehouse reports)
- 2) For Pie Charts : What should be the different sectors for different charts (Eg: for products reports, for warehouse reports)
- 3) For Stock Charts : What should be the different axis point for different charts (Eg: for products reports, for warehouse reports)

Links:

- <http://www.highcharts.com/docs/getting-started/your-first-chart>
- <http://canvasjs.com/html5-javascript-bar-chart/>
- https://docs.oracle.com/cd/E12839_01/bi.1111/b32123/rvtutorial_graph.htm#RSTUT162
- <https://cloud.highcharts.com/>
- <http://www.jqplot.com/index.php>
- <https://www.smashingmagazine.com/2011/09/create-an-animated-bar-graph-with-html-css-and-jquery/>
- <https://www.amcharts.com/>
- <http://www.flotcharts.org/flot/examples/ajax/index.html>
- <https://developers.google.com/chart/interactive/docs/>

Sir this link is shows the work we have done upto now:

Hi Meha and Team,

Please provide steps regarding how to build and up your code for validation.

Regarding graphs as I wrote in the UI spec, make it configurable, i.e categorize graphs like, Pie charts, Bar graphs, tables..etc. There should be configurable option for the end user to change these reports. i.e if user selects bargraphs option, then graph should be in bar graph if user selects pie, then it should change to Pie.. also validate your graphs in all kinds of display sizes.

Since I won't get enough time to spend on this going forward, I am adding my colleague Satish(Ganga) in this mail. From now on, You can contact him for any questions, keep me in all mails.

Regds
KP.

Sir,
All of us were not in campus. So there was small miscommunication gap that caused the delay.
Current status of the project:
Modules that are completed:
1)UI Design.
2)Authentication has been done.
3)Data placing of the components has been done.
4)Graphical modules has been done in various forms listed:

- Pie charts
- Bar charts
- Stock charts using third party services.

Modules that have to be completed:
1) Using dummy data changing the graphs dynamically.
2) Placing the graphs.

We have uploaded the current source code and deployment process in github.
Github link:
https://github.com/Chaitanyachavali/Warehouse_Mg_Hybrid

Sorry for the inconvenience that was caused sir.
Regards,
Team.

Sir,

Here are the deployment steps:

- 1) Go to this mentioned link and download the complete project <https://github.com/Chaitanyachavali/Warehouse_Mg_Hybrid>
- 2) Install PhoneGap Application in desktop and create a project
- 3) In the Project folder which was created in Phonegap, there will be a folder named 'www'
- 4) In the downloaded project there will be a folder named 'www', copy all the file and folders(except 'extras' folder) to the 'www' of the Phonegap project folder.
- 5) In the 'extras' folder there will be an file named 'whm_v2.sql' Import this sql file to your local server.
- 6) In the 'extras' folder there will be a folder named 'php_scripts' copy all the files to your local server.
- 7) In all the *.html change the url in the \$.ajax function to the file path of your local server
- 8) In all the *.php give the correct details of the database
- 9) Make the PhoneGap server up and validate the application.

NOTE: As the 5,6,7,8 steps take more time, and many changes that has to be done we are trying to create a common database.php scripts online so that to avoid making unwanted changes. We will try to make this as fast as possible (by end of today). As we make it online we will mail you.
